**Presents the Following Class for FEATHERWEIGHT LOVERS**  
**THIS IS A HANDS ON CLASS for the Original Featherweight**

1. A brief History of the featherweight.
2. How to get the most from your Featherweight.
3. Common featherweight problems and how to resolve them.
4. Doing your own maintenance. **This is hands on and you will service your machine.** Bring everything you have to maintain your 221.
5. What are all those attachments for?
6. What new attachments are there for my featherweight?
7. Questions & answers

**What you need to bring to class**

1. Your personal featherweight and everything you have for it. ( book, accessory feet, motor lube, cleaning brush, screw driver, bobbins, needles, case, power & foot control cords, thread and cloth)
2. The oiler you use, (if you have one)
3. A flashlight
4. An old towel or cloth to set your machine and items on. (We don't want to get the tables covered in oil and dirt.)
5. A piece of batting about 8" square.
6. A magnifying glass if you feel the need to help you see small things.
7. A couple of rags.

**For those that need items I will try to have the required items available for purchase**
